## Natural Hazard and Climate Adaption

### FLOOD RISK GAULARVASSDRAGET

Feasibility study for NVE and Sunnfjord municipality

The study will form the basis for prioritisation of measures to prevent flooding and related damages, based on societal benefits.

The project includes mapping and assessment of flood risk, aquatic and terrestrial environmental values, landscape adaptation and investigation of flood protection alternatives for the water course.

## Natural Hazard and Climate Adaption

### QUICK CLAY SURVEY ULLENSAKER

Geotechnical engineering services for NVE

Investigation and mapping of risk related to naturally triggered quick clay landslides. Assessment of the affect on existing buildings, including recommendations for risk-reducing measures in case of landslides.

The mapping has been done in 36 previously registered quick clay zones in Ullensaker municipality. The purpose is to prevent naturally triggered quick clay landslides in the area.

## Landscape and Urban Planning

### ECOLOGICAL COMPENSATION - ÅKERSVIKA

Consulting services for the Norwegian Environment Agency

Evaluation of the ecological compensation performed in connection with the extension of highway E6 through Åkersvika, Innlandet.

Nye Veier had a goal of no net loss of nature as a result of building the highway through the nature reserve.

The evaluation examined whether planned measures have been carried out and how these contributed to the goal.
